Aug 23—Ship Ringlander, Lake, Chomachus
Ship Prince Alfred, Choll, Nainaimo.
Ship Randa, Burke, San Juan
Ship Grappler, Devereux, Burrard Inlet
CLEARED.
Aug 23—Ship Ringlander, Lake, San Juan
Ship Randa, Burke, San Juan
Ship W. Wilson, Wilbur, Burrard Inlet
Ship Grappler, Devereux, Burrard Inlet

NEWS! NEWS!
The "British Colonist" is the only newspaper published at Victoria that receives the latest telegraphic dispatches, as a comparison will prove. Late telegrams appearing in any other paper are copied without credit 24 hours after they have appeared in the British Colonist. The circulation of the British Colonist being double that of any other paper published in British Columbia, it offers the best medium to advertisers.

OMINECA.
The Cariboo Sentinel furnishes some additional items of news from Omineca. Dates are the same as those received by telegraph.

Messrs Barnes, Kent, Pool and others, arrived here from Stuart's lake by land, with 173 pack animals and 198 head of cattle. They out and bridged a passable trail for 130 miles in the short period of 30 days, and their arrival here has been the means of reducing the price of provisions, and keeping many miners in the country who would otherwise have been obliged to leave on account of the scarcity and high prices of provisions.

Mr Thaddeus Harper arrived here July 29th by way of Barnes' trail making the trip in 3 1/2 days, so that the trail must be in a very good condition. Yet these enterprising gentlemen—so it is reported—will be obliged to pay toll for packing over their own trail! The miners, merchants and packers are very indignant, and feel very much hurt at the injustice of a charter being granted to any person or persons for a trail already made passable.

Every one here is much excited about the charter, and there is talk of holding an indignation meeting and opposing the payment of any toll on that trail.

Extract from a letter received by Mr J. Donnie from Fred Lynch:

"Abbott and I have been running all over the country to the different creeks that have been discovered, but up to the present time have found nothing. I hear from A. to-day that they intend drifting from the shaft in Black Jack gulch. This gulch is yielding more than any of the creeks that have been struck this spring. Jonah Williams and J. Carson are the only prospectors in Lost Gulch; they are in different companies. Carson brought in 8 oz last evening. Jonah in ground-lacing. On Germanen—which promises to be the "Tybee" creek—J. Bryant, Stocker, E. S. Sampson and a couple more Cornish boys, are doing well on a high bar on the upper portion of the town site. The fortunate men by the new discoveries so far are Black Jack, Shep Young, Discovery co.; Bob Hamilton, T. Emery, G. Williams, Ike Stevens, 2nd co.; Bob Tennant, John Wight and N. Campbell (just from Canada) 3 1/2 co.

The bulk of Serling's goods is at Tattah and will arrive here next week. We have a big town and nothing in it."

DEATH OF GEORGE EDGAR DENNES.—Mr G E Dennes, the first English Solicitor in this Colony, has lately died at Sydney, Australia. Mr Dennes, at one time, enjoyed a lucrative practice in this city. He represented Salt Spring Island in the Legislature from 1863 to early in 1865. On all occasions he wore a tall or plug hat and a dress-coat—both of large size. In the Spring of 1865, (without a change of raiment, or a dollar in his pocket,) he left Victoria and took the steamer to Yale, whence he actually walked to Kemloops, thence struck south through the Okanagan and Spokane countries—then infested by the remnants of savage tribes—and made his appearance in San Francisco three months later, still wearing the tall hat and dress-coat, but minus boots and, save a sore foot, none the worse for his long tramp. When asked how he succeeded in passing through a hostile and savage country unharmed, he replied that the Indians, who are very superstitious, imagined that his tall hat was a mark of righteousness and that he was a messenger of the Most High. They fed and lodged him, supplied him with incense, and after his boots were gone, and passed him from tribe to tribe until he reached Oregon. Subsequently Mr Dennes returned to England and eventually proceeded to Sydney where he was an inmate of an asylum for the insane for two years prior to his death.

WHISKY SELLING.—The charge against Chas Fisher for selling whisky to Indians, for which he was remanded on the 22nd, came up yesterday and occupied some three or four hours. From the evidence of the parties to whom the liquor was sold it would appear that the illicit traffic is carried on to an extent beyond any moderate conception—over \$300 being the amount of cash paid by the Indian in this one sale. The liquor was in barrels and cans and was shipped in casks at Cadboro Bay. The case was postponed and the prisoner remanded for further examination. Mr Courtney appeared for the prisoner.

CARIBOO ASSAY OFFICE.—The Sentinel notes the gratifying character of the business transacted at the Cariboo Branch of the Government Assay Office. The amount of the gold assayed during the three months ending July was \$115,182 and the receipts were \$627. During July alone the amount assayed was \$61,340 the largest quantity in any month except September, 1869.

SCOTT CENTENARY.—Mr Craig has completed and mounted his fine pictures of the Scott Centenary Pavilion and we have to thank him for a copy thereof.

The Survey.
Mr Moberly's party, in charge of Mr Gillette, have left Hope for Kootenay. Mr Moberly went to Kamloops. Mr Moberly left Kamloops for Eagle Pass, to survey from the pass towards the Pacific, and Mr Moberly will join the Gillette party. Mr McLennan's party left Kamloops via the North Thompson route to Tete Jaune Cache, where they expect to meet Mr Mahood's party. Mr Mahood left Kamloops en route for Barkerville, thence to follow the line run by Fred Black to Tete Jaune Cache, whence he will follow the Fraser. All the party were well and in good health and spirits. Mr West, commissary of the survey, arrived last evening and will proceed at once to organize the coast route party.

Vessel Reported Ashore.
The schooner Matilda, Capt Wharton, arrived last evening from Burrard Inlet. Capt Wharton reports being hailed yesterday morning by a man in a canoe who informed him that he saw a bark or brig ashore near Plummer's Pass at the northern end of Saturna Island, but he could not make out what she was. He says she was lying nearly on her beam-ends and was hard and fast ashore. The story needs confirmation.

NEW WESTMINSTER ITEMS.—The Municipal Council will present an address to His Honor the Lieut Governor. The Eureka silver lead, near Hope, is being thoroughly prospected, and great confidence is felt in its richness and extent. The formation of a company with a capital of \$750,000 to work it is talked of. The settlers between the line and Wharfedale declare their readiness to cut a trail from that place to the 49th parallel, provided such trail be continued through to the Fraser. Mr Geo Odlin's little steamer made a satisfactory trial trip on Tuesday. The water in the Fraser is falling slowly. The Guardian is excited over a 16-pound cauliflower.

FROM NANAIMO TO BARCLAY SOUND.—Mr Berton, Chief Engineer of the Madras Railway, whose arrival in this colony was recently noted, explored and found a practicable pass for a railway from Nanaimo to Barclay Sound. The distance from Nanaimo to the Sound, he estimated at 16 miles and so easy is the grade that he travelled to the Sound and back in 14 hours. Mr Berton represents a company of capitalists in London and was sent to this province with the ostensible object of selecting farming land for an English colony, but really to ascertain the practicability of bridging Seymour Narrows and examining the country from Nanaimo to the seaboard.

NEW MERCANTILE FIRM.—We understand that Mr J Robertson Stewart has withdrawn from business in this Province and will be succeeded by Messrs Welch, Ribet & Co. Mr Welch was formerly with Anderson & Co of this city and Liverpool and latterly senior member of the firm of Welch & Co at San Francisco. Mr Ribet has been long and favorably known to our citizens from his connection with the firm of Sprout & Co, and as manager of Mr J Robertson Stewart's business.

The British ship Kenilworth, Capt Baikie, arrived from the Hastings Mills yesterday afternoon. Capt McKinnon, pilot, Capt Raymer, Mrs Raymer and children and Capt Knott, of the ship Ellen Morris, came as passengers. The Kenilworth is bound for Iquique with 500,000 feet of lumber. The ships Otago and Ellen Morris are loaded at Moody, Deliz & Nelson's Mills.

SAD ACCIDENT.—On board H M S Zealous on Tuesday evening Wm Luxton, a seaman, while engaged in removing the awning and decorations fell to the main deck and sustained injuries of a most serious character. His left thigh-bone, both arms and wrists were broken and his skull fractured by the fall. He received every attention at the hands of the medical gentlemen of the ship, but his condition is deemed very precarious.

The plan of a machine for cooling theatres, halls and private buildings, has just been evolved from the heated brain of some scientist. One of these machines will make 200 pounds of ice in an hour, or furnish in the same space of time 30,000 cubic feet of air cooled to a temperature of 33 degrees. It can be applied to the pipes of a register so that, like a wizard's vessel, we can be cooled off or heated from the same receptacle.

FOR NANAIMO.—The steamer Sir James Douglas sailed for Nanaimo yesterday morning at 8 o'clock. The following passengers went up: Hon Mr Langevin, Mr Archibute, Mr Tilley, Mr and Mrs Peck, Capt and Mrs Spaulding, and Messrs Marriener, LePage, Beaumont, Trehart and four or five others. She will return to-night.

It is proposed to organize an army of Sikhs and Sepoys for service in Great Britain, where recruiting has proved a partial failure. It is thought that 20,000 or 30,000 of these classes might be brought in every year until a powerful, well-drilled army, officered by whites, would be formed for home defence.

FIRE.—Yesterday afternoon a spark from a lodger's pipe set fire to the bedding furniture and curtains of a room in the Pacific Telegraph Hotel, and, but for its timely discovery and extinguishment, would have destroyed the whole structure. The damage was slight.

ANOTHER THEFT.—Jas O'Neill, under arrest for the past week on a charge of stealing a pair of pants, the property of S Solomon, was yesterday brought up, convicted and allowed to go on his own recognizances of \$100 to appear in three days for sentence.

The steamship Prince Alfred arrived in Esquimalt harbor from Nanaimo at 8 o'clock yesterday morning and sailed for San Francisco at 9 o'clock. She had 60 passengers, 500 tons of coal and a quantity of oil and furs.

TREASURY SHIPMENT.—Through Wells-Fargo yesterday the following bank shipments of treasure were made: Bank British North America, \$32,922 27; Bank of British Columbia, \$39,742 62; Wells Fargo & Co, \$3,886;—total, \$76,550 89.

ANOTHER SILVER LEAD.—It is reported that Geo Dietz and James Van Bramer have discovered a new silver lead a short distance from Hope, the croppings of which are said to be very rich.

The Great Boat Race.
Our special telegram states that Renforth, the stroke of the Tyne crew, was taken with a fit at the start and died in an hour afterwards. The St John crew rowed over the course which they accomplished in nearly one minute less time than last year.

THEFT.—John Mockee appeared in the Police Court yesterday on a charge of stealing a quantity of clothing. The case was partially investigated and the prisoner remanded until Monday next.

The steamer Enterprise, with the following passengers, returned from New Westminster yesterday afternoon: Miss McGill, Capt Parsons, G Watt, H V Edmonds, O Hine, Gillon, and Roth.

The opposition steamer Taber has been caught off the Southern California coast. The late Puget Sound steamer Olympia is lying up in ordinary at San Francisco, awaiting an opening.

The owners of the Portland steamer Constantine are about to build a new steamer for that trade.

The Saanich Meeting.
EDITOR BRITISH COLONIST:—I have read your report of the Saanich meeting and also that of your contemporary on the same gathering; and as an honest man I am bound to say that your report, though shorter, is the more correct of the two.

I pass over the intense egotism of the editor of your contemporary in dismissing Mr Dalby's really able speech in a few lines and devoting an entire column to his own extraordinary remarks and the foamy splutterings of poor Bunter; nor shall I say a single word against Mr Wallace's oratorical effort. My object in writing to you is to protest strongly against the action of the Chairman of the meeting in vacating his seat when Mr Jessop rose to speak being accepted as a precedent for the guidance of other Chairmen of other political meetings during the approaching battle. Mr McMoyl, I claim, had no right to vacate his seat when a gentleman holding different political views from his own rose to speak. I can well imagine into what a state of discomfiture and confusion public meetings would fall if a new Caxton man had to be elected for every fresh speaker, and I do not think that any person holding such nice ideas of propriety as Mr McMoyl appears to hold should be again asked to preside over a gathering of his fellow citizens if harmony and freedom of speech are expected to prevail. Yours, SAANICH.

The Census of Japan.
From the New York World July 30th.

On the first day of the Japanese year, styled in the vernacular Meiji, or, according to our computation, the 1st of February, 1871, the Mikado ordered a census of his dominions, and in a Yokohama paper appears the first official announcement of results. The population is given as 34,785,951, or about three millions more than the United Kingdom of Great Britain and Ireland, and about the same less than the United States. Heretofore there has been only an estimate of the number of Japanese—statistics conceived of that on the hypothesis of the empire being as thickly populated per square mile as China, it must have some forty million inhabitants. By some six millions the census shows them to have been out of the way.

Of the population returned, 17,586,700 are given as males, and 17,199,251 females—this excess of males which is ordinarily supposed on y to be found in the populations of comparatively new countries forming a very peculiar feature in so ancient an empire as Japan. The royal family is given as made up of twenty members, including the Mikado, and under the royal blood the daimios, or great lords, number 3,186. The liberal and military number 1,872,959, and the farmers, artificers, laborers, and work-a-day people generally 31,954,821. The priests of the Buddhist faith number 244,869, and the Junto clergy 163,140, with 6,711 nuns. The professional beggars are \$2,920. After all come in the returns, as in the daily life of Japan, the Yeto or outcasts, a class of pariahs, who are treated much as the cagots were in old Bourbon France—herded together in filthy villages and condemned to the most servile trades. These gentry number 456,695. The number of houses in Japan is given as 7,092,748, which allows about five persons to a dwelling, and it is remarkable that this is the exact ratio shown by the late census of England. The figures curiously compare:

The unit in estimating the revenue is the koku, a measure of grain worth 10 84 currency and the receipts are estimated at \$3,559,019 koku or \$331,259,765. This gives a per capita taxation of \$8 49 but when the Jap has paid that there is an end of it, his life apparently not being worn out of him by the complicated taxes civilization entails. Of the \$331,259,765 raised in Japan annually, and this it must be remembered is for just and every public purpose the throne, the daimios, the towns, etc. The Mikado has a nominal amount of \$93,732,017, but it seems almost like home to read that of this sum but a comparatively small portion there is reason to believe ultimately finds its way to the imperial treasury; much is not collected at all, whilst from the excessive number of officials employed and their inefficiency and corruption the cost of collection is undoubtedly swollen to an amount per cent, that would altogether appal European financiers.

A Newfoundland correspondent writes that about the 21st of last month two enormous masses of ice passed the harbour of St John's each reported to be half a mile in length. Heaven help the unfortunate vessel that may encounter them in a fog. One of the mail steamers struck one of the islands of ice, and had a narrow escape from destruction. Nothing like them is remembered by "the oldest inhabitant." These low, flat islands of ice are formed along the shore of Greenland by the freezing of sea water; snow drifts on the heap from the land in great masses and is again and again submerged and frozen, and at length a long island of ice forty feet above the waves is formed, and drifts away southward. The larger bergs are the produce of glacial action.

By Electric Telegraph.
SPECIAL TO THE DAILY BRITISH COLONIST.
LAST NIGHT'S DISPATCHES.
THE GREAT BOAT RACE.
DEATH OF RENFORTH.
THE ST JOHN CREW WIN!
Renowned Defeat of the Americans at Corea!
Canada.

St John's Aug 22—Both crews have finished their training and are resting to day. They are in capital condition and a splendid race is anticipated. The city is crowded with visitors. There is very little betting, but the odds are still in favor of the Tyne crew.

HALIFAX, Aug 22—The second Tyne crew are confident and anticipate that the only contest will be between them and the Renforth crew. There are five entries for a single scull race, which excites almost as much interest as the 4-oared race.

MONTREAL, Aug 22—The Mayor has ordered stringent regulations for cleaning the streets in view of the approach of cholera.

St John's, Aug 22—The great scull race for the championship of the world came off this morning. The boats started at 7:25 and led alternately for five minutes. At 7:33 St John was ahead. At 7:40 St John was the only crew rowing, the other crew having gone ashore in consequence of Renforth being taken with a fit. The St John crew rowed over the course, winners of the race. Time—40 min 11 sec.

Later—Renforth died an hour after the race. The odds were in favor of the Tyne crew up to the time of starting, with considerable betting.

Corea.
New York, Aug 22—Full details of the second battle between Admiral Rodgers' fleet and the Coreans, together with a list of the officers engaged, have been received. It seems that 600 Americans defeated 6000 barbarians. The Navy Department is in receipt of dispatches from the Admiral which will be given to the public to-morrow.

The latest Anglo-Chinese newspapers contain a startling rumor that the Colorado and another American man-of-war had run aground and were captured by the Coreans and all on board massacred with the exception of Minister Low, who was retained as a hostage. There is no confirmation of this alarming intelligence from official sources.

Special correspondents describe the affair on the 11th as a brilliant victory. More than 480 guns were destroyed and 50 flags taken, while at least 1000 Coreans were killed or drowned. A Shanghai correspondent writes: "It is hoped here that the American Government will send reinforcements so as to enable the Admiral to carry out the programme of the expedition to the end. Unless something is done soon the Americans will lose greatly in the estimation both of the Chinese and Japanese."

The Evening Post condemns the war on Corea and says it hopes this is the last time the Government will attempt to do diplomatic work in the East at the cannon's mouth and the last time ever Christian civilization will appear in arms before heathens and barbarians to extort from them what they have a right to withhold.

Europe.
VERSAILLES, Aug 22—In the court martial to-day members of the Paris Fire Department deposed positively that the Commune had ordered the firing of public and private buildings and had forbidden them to extinguish the flames in the Palais Royal.

The Debats proposes the disbandment of the national guard. The Conservative journals advocate and the Radical ones oppose this step. Fears are expressed that its enforcement will meet with opposition in Lyons and elsewhere.

PARIS, Aug 22—M Drouyn de Lhuys has been appointed French Ambassador at Vienna.

Rentes—56 francs, 4 centimes.

MUNICH, Aug 22—A committee of Conservative Catholics has invited the Catholics of Germany, Austria and Switzerland to a Congress to be held here on the 22nd of September.

HAMBURG, Aug 22—The Emperor and Empress of Brazil arrived in this city to-day.

ST PETERSBURG, Aug 22—The Czar has issued an Imperial ukase abolishing the privileges hitherto enjoyed by German subjects in Russia.

DUBLIN, Aug 22—As a band of music was passing through the streets of Limerick to-day, followed by a large crowd, a signal was given and the mob commenced stoning the police who were watching the procession. The latter immediately rushed on their assailants and after some hard fighting succeeded in dispersing them. Several persons were injured and taken to the hospital.

Eastern States.

New York, Aug 22—The last advices received are to the effect that subscriptions to the new loan in Europe largely exceed the allotment, and it is probable that heavy drafts will be made through the banks upon the fifty millions placed in the market in this country. Unless the national banks secure all that is necessary for their own convenience, to-morrow the loan will be exhausted.

The steamer Wyoming, hence for Providence, is reported sunk a few miles down the coast, having the appearance of being blown up by powder or steam. No particulars have yet been received except that the crew are safe.

The Quarantine Commissioners have appropriated \$25,000 for the erection of extra buildings for the reception of one thousand persons.

PETROLEUM IN NOVA SCOTIA.—The Windsor Mail is in possession of a piece of rock containing crude petroleum found at Cheverly, Hants Co. It was broken off by a blow of a maul from a rock which was thoroughly saturated with petroleum, and contained cavities partly filled with oil. When exposed to heat, the oil issues out of this rock in a manner perfectly astonishing to the uninitiated. Mr John Browne, the proprietor of the Manganese Mines at Weston, is forming a company to commence operations, and another gentleman who has had an experience of several years in the oil regions of Pennsylvania, has obtained leases of land adjacent for the purpose of forming a company and prosecuting vigorously the search for petroleum in that locality. Halifax Paper.

From Japan.
We have dates from Yokohama to July 21st. The land part of the telegraph is being rapidly proceeded with and will soon be completed. A typhoon has been doing much damage on the coast. The Japan papers notice the departure of the special Ambassador to conclude a treaty on behalf of that country with China, on the model of the treaties with other foreign nations. The country, as far as we can judge, says the Yokohama Gazette, is at peace, and fears of disturbances are for the present dispelled. The villagers are busy gathering in their crops, which this year have yielded an abundant harvest, and everywhere the people begin to acknowledge that with all its faults the present Government has their well-being at heart. Immense improvements are being made in Yedo. The roads are being widened and deepened. Large godowns are building on the canal side, as depots for military and naval stores. Sites have been chosen for the construction of commodious barracks, for the accommodation of the national soldiers, and a new palace is to be built for the Mikado. The several sections of the railway works are progressing rapidly, and the first bridge of any proportions on the five between Yokohama and Yedo has just been completed. It is asserted that traffic between this and the capital will be opened by the end of the year, but we hardly think this possible.

There are eight pin factories in the United States if we may pin our faith to the report of a statistical periodical. The produce is \$720,000,000 pins, but the amount of pin money accumulated from the manufacture is not stated.

A. GILMORE, MERCHANT TAILOR, and General Outfitter, has removed his place of business to the store adjoining the Colonial Hotel and opposite the Colonist Office, on Government street, fourth door from Yates, where he proposes to give his old friends and new customers a chance on the principle of quick sales and small profits.

REMEMBER THE FATE OF ABRAHAM.—Fred Payne, Funeral Artist. Shaving 12 1/2 cents. Hair Cutting 25 cents. Shampooing 25 cents. That Original Cheap Shaving Shop stand on the sunny side of Johnson street.

Mr C A NOLTEMIER has returned from San Francisco with a splendid assortment of boots and shoes of the latest styles, which he will sell at low prices. Boots made to order and warranted to fit. Repairing neatly done.—Government street, next to the St Nicholas Hotel.

FILL'S COFFEE, superior to any other manufactured on the coast, may be obtained at all respectable dealers throughout the Colony.

THOUSANDS OF ROSY LIPS.
Attest the many virtues of the genuine Murray and Latman's Florida Water. Matchless as a perfume, it is equally matchless as a cosmetic, all the irritation of the skin, relieving headache, preventing faintness, and when diluted the best of tooth washes. Truly it is the most valuable of all floral waters.

There are worthless counterfeits abroad. Always ask for the Florida Water prepared by the sole proprietors, Lanman & Kemp, New York.

MARAVILLA COCA.—No breakfast is complete without this delicious beverage.—The Gobe says, "Various importers and manufacturers have attempted to attain a reputation for their prepared Cocos, but we doubt whether any thorough success has been achieved until Messrs Taylor Brothers discovered the extraordinary qualities of 'Maravilla' Cocoa. Adapted to all species of the Teobroma, they have produced an article which supercedes every other Cocoa in the market. Entire solubility, a delicate aroma, and a rare concentration of the purest elements of nutrition, distinguish the Maravilla Cocoa above all others. The man or woman who invalids we could not recommend more agreeable or valuable beverage." Sold in packets only by all Grocers of whom also may be had Taylor Brothers' Original Homoeopathic Cocoa and Sober Chocolate. Steam Mills—Briek Lane, London. Export Chicory Mills, Bruges, Belgium. mch12 la wa

35 YEARS OF SUCCESS.
Have attended the use of Bristol's Serravallo's Pills, till now their sterling excellence and wonderful virtues have borne down all opposition and established the fact that they are the surest and safest of all medicines for Strengthening the Stomach, Invigorating the Liver, Tuning the Bowels, Stimulating the Kidneys, and Purifying and Cleaning the Blood and Humors. Let the sick and suffering try them without delay.

Biliousness and Indigestion.
These two complaints are more general at this season of the year than at almost any other. They are closely akin; for biliousness always involves an impaired digestion, and indigestion is necessarily an accompaniment of a disordered or torpid liver. Happy the man or woman who can boast of a stomach that has never felt the horrors of dyspepsia, and to whom that great corrective agent the liver, has never given pain or trouble. Not one in a thousand can lay claim to entire immunity from irregularity in these organs. How, then, shall they be regulated? Not by powerful cathartics, alternated with ordinary stimulants, but by a medicinal invigilant, like Hostetter's Stomach Bitters, which combine in due proportion the tonic and the alterative principle. Wherever there is a church, schoolhouse, and a general store, this famous medicine may be procured. No village merchant finds it prudent to be without it, for it is required for every day by every class. The workmanman buys it because it increases his capacity for toil, and is followed by no reaction. The effect of the salubrious roots, herbs, etc, of which it is composed, diffused through his whole system by the pure stimulant which forms the basis of the Bitters, is most healthful and invigorating. The scholar, the merchant, and in fact all men whose minds derive benefit from its use. To persons of sedentary habits it supplies in some measure the activity in the circulation which is obtained by physical exertion, and is the best known remedy for constipation.

Ask for Hostetter's Stomach Bitters, and do not be coaxed into purchasing any of the imitations and frauds sometimes offered in its stead.

A bank account is good to have, but if it freely drawn upon it runs out. Bodily health is the first of blessings, but because a good constitution bears abuse wonderfully, do not assume that a reckoning day will come. Live sensibly and moderately; and at the first symptom of dyspepsia, disorders of the skin, kidneys, liver, or blood use promptly Dr. WALKER'S VERMILION PINKETTS. This unrivalled purifier of the blood and renovator of the system, which is a certain cure.

LOST, STOLEN OR MISLAD.
\$5 REWARD—TWO LETTERS ADDRESSED TO the undersigned have been lost, stolen or mislaid. Were last seen at the Victoria Post Office about Dominion Day. Anyone (not being a Postmaster) giving information that will lead to their recovery, will receive the above reward. E. STAMP, Masonic Hall, Victoria.
